List 5 Key Take-Aways from the Seminar

- The College of Engineering and Computer Science has its own career services office tailored to the unique needs of its students.
- They offer a variety of services, including resume building, job searching, and utilizing Handshake, a platform for job search, networking, and more.
- The college hosts career fairs, workshops, and events to help students with their professional development and networking.
- When creating a resume, it's important to keep it concise, use action verbs, and focus on quantifiable achievements. Personal pronouns should be avoided, and it should be tailored to the job application's requirements.
- The College of Engineering and Computer Science hosts two types of career fairs each semester: lunch and learn sessions and meet the employer sessions, catering to different time preferences and industries. Tech companies often prefer to host virtual sessions and do not always attend traditional career fairs, so students interested in tech careers should explore alternative networking.
